

Note:

As of 2001, the statistical tables and charts were changed to reflect the actual number of people involved in the Alberta apprenticeship and industry training system. In previous years, the data reflected the number of registrations, graduations and certificates issued rather than the number of apprentices registered and the number of certified individuals. The distinction is important. The first reflects the paper processed in a given period of time and the other reflects the number of people involved.

In the past, these numbers differed minimally. With the creation of various branches of individual trades and with the availability of multiple certifications within one trade, these numbers are increasingly divergent.

Please note that in 2003 the technical training information was also changed to reflect the school year. Prior to 2003, technical training attendance was provided based on the calendar year for consistency with other calendar year data (e.g. registrations). The switch to school year data provides a more accurate reading of the technical training data.

As a result of these changes, the data provided in the tables and charts that follow will not correspond to the data provided in Alberta Apprenticeship and Industry Training Annual Reports prior to the changes.

Source: Alberta Advanced Education and Technology and Statistics Canada

Total Apprentices Registered: Total number registered as of December 31, 2011. Apprentices may be registered in more than one trade or branch of a trade within the same year but are counted here only once.

New Apprentices Registered: All apprentices registering during a single calendar year. The number includes those who are returning to do an additional apprenticeship after completing one or more apprenticeships in previous years, or continuing an apprenticeship in another trade for which they registered in a previous year. Apprentices who registered in more than one trade or branch of a trade within a specific year, or who changed from one branch of a trade to another branch within the same trade on the same day, are counted only once. The number does not include reinstated apprentices (unless reinstated in the same year).

* Total number of apprentices registered as of December 31 each year. Apprentices may be registered in more than one trade or branch of a trade within the same year but are counted here only once.

N/A = Not Applicable. Data does not exist in one or more of the specified years.

Note 1: The designation of the trade of electronic technician was rescinded effective September 1, 2007. Effective September 1, 2005, contracts of apprenticeship were no longer accepted for registration.

Note 2: Natural gas compression technician became a designated trade on September 1, 2011.

Note 3: Approximately 885 of the rig technician apprentices are from Canadian jurisdictions other than Alberta.

Note 4: Effective April 1, 2011, the designation of the trade of tool and die maker is rescinded. As of May 1, 2009, contracts of apprenticeship were no longer accepted for registration.

* New apprentices include all apprentices registering during a single calendar year. The number includes those who are returning to do an additional apprenticeship after completing one or more apprenticeship programs in previous years, or continuing an apprenticeship in another trade for which they registered in a previous year. Apprentices who registered in more than one trade or branch of a trade within 2011, are counted here only once. The number does not include reinstated apprentices (unless reinstated in the same year).

N/A = Not Applicable. Data does not exist in one or more of the specified years.

Note 1: Natural gas compression technician became a designated trade on September 1, 2011.

Note 2: Approximately 350 of the newly registered rig technician apprentices are from Canadian jurisdictions other than Alberta.

Note 3: Effective April 1, 2011, the designation of the trade of tool and die maker is rescinded. As of May 1, 2009, contracts of apprenticeship were no longer accepted for registration.

- Note 1: Effective September 1, 2011, the old four-period marine and recreational branches of the outdoor power equipment technician trade changed to the new three-period recreational branch of the trade, and the old four-period turf and power branches changed to the new three-period power branch.
- Note 2: The parts technician trade merged with the warehousing occupation on May 1, 2008. The parts technician trade now has two branches - parts technician and materials technician. Apprentices who completed or were granted credit for first period technical training by June 30, 2008 could continue in the old parts technician program.

Chart 1

Total Number of Apprentices Registered by Year, 1991 - 2011

Source: Alberta Advanced Education and Technology

* This graph represents statistics covering a series of calendar years (January to December).

Chart 2

Age of Alberta Apprentices on Date of Registration in First Trade, 2011*

Total number of Alberta apprentices registering in their first trade in 2011 = 14,153**

Source: Alberta Advanced Education and Technology

* Age at date of registration.

** The 14,153 total in the chart above includes only individuals registering in their first trade in Alberta in 2010. This number differs from the total number of new apprentices registered (17,371) as presented in Table 3. In Table 3, the number of new apprentices registered includes those who are returning to do an additional apprenticeship after completing one or more apprenticeship programs in previous years.

Mean - defined as the sum of the ages of all apprentices divided by the total number of apprentices involved, i.e., average age.

Median - defined as the middle age category with an equal number of apprentices younger and older than this group.

Mode - defined as the largest age category or most frequent age of apprentices.

Chart 3

Total Apprentices Being Trained by Employer Site Size, 2007 - 2011*

Source: Alberta Advanced Education and Technology

*The size of a employer site is determined by the number of tradespeople.

* Individuals issued more than one certificate in 2011 are counted here only once.

** Indicates that some, not all, branches of this trade have a Red Seal designation.

N/A = Not Applicable.

- Note 1: This number includes the number of Interprovincial Red Seals Issued to Completed Apprentices and Trainees in 2011 regardless of the year the apprentices or trainees completed their training.
- Note 2: A Qualification Certificate is a certificate issued to individuals who, through an assessment of their prior work experience, knowledge and skills in a designated trade or occupation, demonstrate they meet the standards set for certification in Alberta.
- Note 3: Equivalency documents were issued to individuals who hold a valid trade or occupational certificate to indicate that the person holds a specific certificate and is permitted to work in a particular trade, or branch of a trade, or that the person holds a specific certificate that is recognized as equivalent to an occupational certificate in a named occupation. Equivalency documents are not issued to individuals who hold a certificate that bears an Interprovincial Standards Red Seal. Fourteen of the 18 individuals who received Equivalency documents for the automotive service technician trade also received Equivalency documents for the heavy equipment technician trade.
- Note 4: 'Other Red Seals Issued' includes red seals issued to individuals other than those who have completed an Alberta apprenticeship or occupational training program. The number includes red seals issued to individuals who were certified through Alberta's Qualification Certificate Program or Occupation Training and Certification Program (without completing a trainee program) and to individuals who successfully completed the interprovincial examination in Alberta rather than in the jurisdiction in which they were originally certified.
- Note 5: Natural gas compression technician became a designated trade on September 1, 2011.
- Note 6: Effective April 1, 2011, the designation of the trade of tool and die maker is rescinded. As of May 1, 2009, contracts of apprenticeship were no longer accepted for registration.
- Note 7: Residential construction site manager became a designated occupation on September 30, 2011.

* Individuals issued more than one certificate in each year are counted here only once.

N/A = Not Applicable. Data does not exist in one or more of the specified years.

Note 1: The designation of the trade of electronic technician was rescinded effective September 1, 2007.

Note 2: Natural gas compression technician became a designated trade on September 1, 2011.

Note 3: Effective April 1, 2011, the designation of the trade of tool and die maker is rescinded. As of May 1, 2009, contracts of apprenticeship were no longer accepted for registration.

Note 4: Residential construction site manager became a designated occupation on September 30, 2011.

Note 5: The warehousing occupation merged with the parts technician trade on May 1, 2008. Individuals registered in the warehousing occupation on that date had the option to complete their existing warehousing training and become certified prior to May 1, 2010.

* These statistics cover the school year from August 1 to July 31 for each year represented, with the exception of the 2011/2012 school year. The data for this year is the attendance as of the date of printing (March 2012).

- Note 1: Delmar College and Eveline Charles Academy provide technical training for hairstylists. The hairstylist trade has a two-year apprenticeship program.
 Note 2: Eveline Charles Academy won the bid to provide hairstylist training in the northern part of the province as of August 1, 2009, replacing Marvel College.
 Note 3: Effective August 1, 2009, Grande Prairie Regional College assumed responsibility from NAIT for NAIT's Fairview campus and Grande Prairie campus.
 Note 4: 'Other' training providers may not provide apprenticeship technical training every year. Other training providers include:
 ATCO Electric - is accredited to provide technical training for its powerline technician apprentices.
 British Columbia Institute of Technology - provided sawfiler training.
 Crane Safety Ltd. - trains only crane and hoisting equipment operator - wellhead boom truck, which is a one-year apprenticeship program.
 Enform - (previously Petroleum Industry Training Service) trains only crane and hoisting equipment operator - wellhead boom truck, which is a one-year apprenticeship program.
 FortisAlberta Inc. - (previously Aquila Networks Canada, Utilicorp Networks Canada and Trans Alta Utilities) is accredited to provide technical training for its powerline technician apprentices.

* These statistics are as of December 31, 2011.

N/A = Not all trades have four periods. The N/As indicate where there is no period in that trade.

Note 1: 'No TT Required' refers to those apprentices who have completed, or who have been granted credit for, all technical training (TT) requirements in their apprenticeship program. Industry examination and/or work experience/on-the-job training requirements for the trade have yet to be successfully completed.

Note 2: Natural gas compression technician became a designated trade on September 1, 2011.

Note 3: Effective April 1, 2011, the designation of the trade of tool and die maker is rescinded. As of May 1, 2009, contracts of apprenticeship were no longer accepted for registration.

* This table represents statistics covering the January to December 2011 calendar year. Technical training in Table 7 is reported as school year. For this table only, the technical training statistics cover the calendar year for comparability within this table.

** Attendance reflects the number of technical training seats occupied.

- Note 1: Alberta provides training for apprentices from other Canadian provinces and territories where the trade is designated but the jurisdictions are unable to provide technical training due to small apprentice registration numbers. Alberta does not issue these individuals a certificate. They are not counted in Table 5 under Completed Apprentices.
- Note 2: Alberta registers apprentices and provides technical training to people from jurisdictions where no apprenticeship program exists. Alberta issues a certificate on completion of the program.
- Note 3: Not all apprentices attend technical training in any given year. The reasons for not attending may include:
- Apprentices do not normally attend technical training until they have had at least eight to 10 months of on-the-job training with their employer.
 - Some apprentices are graduates of accredited post-secondary technical programs or have completed an apprenticeship program in another trade and have received credit for their technical training.
 - Some have successfully completed all of the technical training and have only the required on-the-job training to complete before being eligible to be certified.
 - Some prefer to obtain the study material (ILMs - individual learning modules) and learn at their own pace, and then challenge the industry exam.
 - Some are in the Registered Apprenticeship Program (RAP) and attending high school and are not able to attend technical training.

* The meetings counted in this table are in-person meetings only. Many committees also conduct meetings on a single item or through ballots, faxes or phone conversations. These are not included in this table.

N/A: Not applicable refers to trades where local apprenticeship committees do not exist. Designated occupations do not have local committees.

Note 1: Subcommittees of the Powerline Technician Provincial Apprenticeship Committee and Power System Electrician Provincial Apprenticeship Committee held two joint meetings in 2011. Both joint subcommittee meetings are counted in the totals for each provincial apprenticeship committee but are only counted once in the subcommittee total.

Note 2: The Petroleum Competency Program Steering Committee serves as the industry committee for the oil and gas transportation services, snubbing services and well testing services supervisor designated occupations. It also serves as the provisional committee for slickline operator. In 2012, the Steering Committee met once. That meeting is counted for each of the occupations they represent but is only counted once in the total.

Table 11

Number of Participants in the Registered Apprenticeship Program (RAP) by Trade as of December 31, 2011

Trade	High School	Full Time	Certified (Note 1)
Agricultural Equipment Technician	21	46	28

High School = RAP participants currently in high school.

Full Time = RAP participants who have completed high school and are now full time apprentices.

Certified = RAP participants who have completed their apprenticeship program and are now certified tradespeople.

Note 1: Total number of RAP participants certified since inception of program.

Note 2: Natural gas compression technician became a designated trade on September 1, 2011.

Note 3: Effective April 1, 2011, the designation of the trade of tool and die maker is rescinded. As of May 1, 2009, contracts of apprenticeship were no longer accepted for registration.

Chart 4

Number of New Registrants in the Registered Apprenticeship Program (RAP) by Year, 1992 - 2011

Source: Alberta Advanced Education and Technology

* This graph represents statistics covering a series of calendar years (January to December).

Chart 5

Total and Aboriginal Apprentices Registered, 1996 - 2011

Source: Alberta Advanced Education and Technology

* In 2007 and 2008, the statistical methodology changed, therefore, the numbers in those two years cannot be compared to those of previous years.

Chart 6

Total Number of Women Apprentices Registered, 1996 - 2011 - All Trades*

Source: Alberta Advanced Education and Technology

* This graph represent statistics covering calendar years (January to December).

Table 12

Number of Apprentices Registered - Total, Aboriginal and Women, 2011*

Trade	Total Apprentices Registered	Aboriginal Apprentices Registered	Women Apprentices Registered

Total - Trades	57,004	2,530 (Note 4)	5,092

Source: Alberta Advanced Education and Technology

* Total number of apprentices registered as of December 31. Apprentices may be registered in more than one trade or branch of a trade within the same year, but are counted here only once.

Note 1: Natural gas compression technician became a designated trade on September 1, 2011.

Note 2: Approximately 885 of the rig technician apprentices are from Canadian jurisdictions other than Alberta.

Note 3: Effective April 1, 2011, the designation of the trade of tool and die maker is rescinded. As of May 1, 2009, contracts of apprenticeship were no longer accepted for registration.

Note 4: Apprentices choose whether or not to disclose their Aboriginal heritage when registering. The total number of Aboriginal apprentices reflected here indicates those who disclosed their Aboriginal heritage. There may be additional apprentices with Aboriginal heritage registered who did not disclose that information.
